Cooled Radiofrequency Ablation (COOLIEF) for Painful Total Knee Arthroplasty

IS YOUR KNEE PAINFUL AFTER JOINT REPLACEMENT?

Principal Investigator

Dr. Alex Rabinovich, MD, FRCSC
Orthopaedic Surgeon

What is this study about?

- COOLIEF is a technique to disable nerves that only provide pain sensation around the knee.
- This study is evaluating COOLIEF for patients with pain following a knee replacement.

Who can participate

- Ongoing pain after 1 year from knee replacement without known complications
- Recommended COOLIEF as part of their treatment plan
- Adults \geq 18 years old

What is involved

- Receive COOLIEF for painful knee replacement after successful diagnostic injection
- Complete questionnaires for knee pain and function at Baseline, 13, 26 and 52 weeks after COOLIEF procedure
