Seeking Patients with Hip Arthritis for CINGAL™ study

This McMaster University study is looking at the effects of a hip injection with Cingal™ (Viscosupplementation with Corticosteroid) on the relief of hip pain and activity levels over a 6-month period.

You will receive a free Garmin Vivofit activity tracker for your participation

You may qualify for the research study if:

- You are between the ages of 40 and 65
- You have mild to moderate osteoarthritis of the hip
- You agree to monitor your physical activity for 6 months using a **Garmin Vivofit activity tracker**
- You are willing to receive an ultrasound guided hip injection with Cingal™

To be considered for this study, please contact our office:
ArthroBiologix at **(289) 389 – 8181** or email us at **Office@DrAlex.ca**
